ABOUT

Cryptocurrency

A **cryptocurrency** or coin is a digital currency designed to work as a medium of exchange through a computer network that is not reliant on any **central authority**, such as a government or bank, to uphold or maintain it.

- A cryptocurrency is a tradable **digital asset** or digital form of money.
- It's built on blockchain technology that only exists online
- The first decentralized cryptocurrency was Bitcoin, which first released as open - source software in 2009. Since the release of Bitcoin, many other cryptocurrencies have been created.
